

BC-12 charger

Dual position charger for BU-12 batteries

Compact size and can charge 2 batteries simultaneously

Powered by ADC-1340A T-201/201e AC adaptor

Charge your flat BU-12S or BU-12L batteries outside your splicer while using another BU-12S or BU-12L to work

Specification

Product	BC-12 dual position battery charger
Applicable batteries	BU-12S and BU-12L
Charge time BU-12S	Approximately 150 minutes at 25°C
Charge time BU-12L	Approximately 165 minutes at 25°C
Charging circuits	2 independent charging circuits. Charge times are the same if 1 or 2 slots are occupied
AC supply	100~240V ac, 50/60Hz with Sumitomo ADC-1340A AC adaptor
Operating conditions	0°C to 40°C Humidity: ≤95% non-condensing
Storage conditions	-40°C to +80°C Humidity: ≤95% non-condensing (BC-12 only, excludes battery)
Dimensions	80mm(w) x 155mm(d) x 74mm(h)
Weight	274g
Charge indicator	Yes. LEDs indicate charging operation of each battery
